LAKE COUNTY
winegrape growers

DIAMONDS ARE FORGED UNDER INTENSE PRESSURE.

Farming in Lake County is a labor of love.
In this mountainous land of rugged beauty, brilliant light, and red volcanic earth, our growers tend to the vines with an uncommon degree of care.

Their goal? To deliver fruit that is the purest expression of varietal, land, and location. Open a bottle of Lake County wine and discover a gem from California's North Coast.

Shards of volcanic obsidian are found throughout Lake County vineyards.
